

# International Conference on Emerging Trends in Cyber Security (ICETCS 2024)

<https://ritechs.org/conferences/ICETCS2024>

Sep 9-10, 2024 Hybrid Mode Conference

Online and Face-to-Face  
Wolverhampton, UK

- Accepted Paper will be Published in Scopus Indexed Journal
- Attending Free workshop on "How to Write a Quality Journal paper"
- Free CPD course on "Introduction to cyber security" and Certificate will be provided
- Participating CPD courses on *Cyber security essentials, Cyber security for the board and GDPR* (T&C)

## Keynote Speakers

Prof. Dr. Kim-Kwang  
Raymond Choo  
University of Texas at San  
Antonio, USA

Prof. Dr. Zeeshan  
Pervez  
University of  
Wolverhampton, UK

Assoc. Prof. Dr.  
Zakirul Alam Bhuiyan  
Fordham University,  
USA

Prof. DR. David  
Oswald  
University Of  
Birmingham

## Major Tracks

- ❖ Cyber Security and Network Space Challenges and Solutions
- ❖ Cyber Security Challenges for Mobility, Transport Infrastructure, Connected and Autonomous Vehicles
- ❖ Cloud Security, and its future
- ❖ Blockchain Architecture and Security
- ❖ Securing the Connected World: Challenges and Solutions in IoT Cybersecurity

## Submission & Publication

Authors are invited to submit their Abstract using the link.

[Abstract Submission Link](#)

- \* Papers accepted for publication will be featured in a Scopus-indexed journal ([Cyber Security and Applications](#))
- \* Authors of accepted abstracts will receive complimentary access to a workshop on "How to Write a Quality Journal Paper".
- \* Registered authors are eligible to participate in a complimentary CPD course titled "Introduction to Cybersecurity" with the issuance of a certificate upon completion.
- \* Authors can opt to enrol in additional CPD courses, such as **Cybersecurity Essentials, Cybersecurity for the Board, and GDPR**, by paying an extra fee of 200 USD per course.

## ICETCS 2024

ICETCS 2024 Conference aims to facilitate discussions on cutting-edge research, innovative technologies, and practical solutions that address the evolving challenges posed by cyber threats in our interconnected world. By fostering interdisciplinary dialogue and knowledge exchange, the conference aims to contribute to the development of robust cybersecurity strategies, enhance collaboration between academia and industry, and ultimately strengthen collective resilience against cyber threats on a global scale. Conceptual, constructive, empirical papers, proposals for tutorials, special sessions, workshops, forums, demos, and exhibitions are also cordially welcome.
